

# SNÖOPSTICK™

From CYBERSitter®

## Screen Shots

**SnoopStick Control Panel**

- Connect and View Remote Activity**  
The SnoopStick Activity Viewer allows users to view Web/IM activity on computers that SnoopStick is installed on in real time.
- View Logs Stored On Your SnoopStick**  
This option allows you to review activity for computers that you have previously connected to and gotten activity reports/logs from.
- Synchronize Log Files**  
Synchronizing Log Files will copy log files from a computer with SnoopStick installed on it to the USB drive. This way, you can copy the logs and review them at your leisure directly from your SnoopStick.
- Install SnoopStick**  
Install SnoopStick on this computer to record/filter web activity. This is NOT required to run the SnoopStick Activity Viewer so you can monitor computer activity remotely.
- Configure SnoopStick**  
If SnoopStick is installed on the machine you put the SnoopStick key into, you can use this tool to configure it's options, such as allowable Internet times and programs to block from using the Internet.
- SnoopStick License Manager**  
Use this tool to add or renew licenses for your SnoopStick.
- Send Support Request/Question**  
Click here to send a message to our Support Department. We will email you back with a response to the address you supply in the next screen.

# SNÖOPSTICK™

From CYBERSitter®

Are your children really safe when playing on the Internet ?

## Protect Children from Internet Predators

- Monitor where your kids go online
- Watch who they chat with & what they say
- See who they exchange email with
- Observe in real time or offline from archived data
- Block Social Networking websites in one 'click'

Remotely Monitor and Control what your children have access to on the Internet, from their home PC's.

TRUE CONCEPTS LTD  
introduces

## Are Your Kids Really Safe on the Internet?

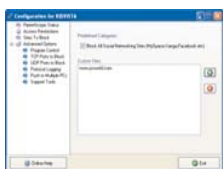

### Here are the alarming facts...

- 1 out of 5 kids have been solicited sexually online.
- 1 out of 17 kids have been harassed, threatened, or bullied.
- One third of kids have been contacted by a stranger and half of these were considered inappropriate.
- Most kids will **not** report inappropriate Internet contact to their parents because they are afraid of losing Internet privileges.
- 9 out of 10 parents will never know that any inappropriate contact has occurred.

Simply insert the Snoopstick device into a USB port on the computer you wish to monitor and run the 60 second intall program.

Remove the Snoosptick and plug it into any other Internet connected PC to monitor activity and take control of your childs Internet experience in real time.

Select and configure Snoopstick's functions to block Websites visited, IM conversations and setup trigger words to alert you!

**Snoopstick is the ONLY product currently on the market that lets you see what is going on NOW, live on your home PC's and can selectively block activity remotely from any PC in the world!!**

### MONITORS ALL THESE PROGRAMS!

Peace of mind for only £55.95 plus P&P  
To order visit [www.trueconcepts.co.uk](http://www.trueconcepts.co.uk)

View and save an instant screen snapshot of the computer being monitored, any time.

Monitor all web site access. Works with all browsers and web enabled programs.

Monitor both sides of "instant messenger" communications.

Automatically translates frequently used Instant Messenger abbreviations.

Works with all popular IM programs.

Monitor all email access (SMTP, POP3, IMAP) to see who and when emails were received from and sent to.

Monitor activities in real time, or retrieve activity logs from recent activity. SnoopStick records everything, whether you are monitoring in real time or not.

Store up to 12 months of activity logs directly on your SnoopStick.

All program modules are updated completely automatically so you always have the latest version.
